SUMMARY

Software engineer with 3+ years building and maintaining production web applications and backend services. Strong foundation in SQL and relational data modeling, object-oriented design, test-driven development, and Agile delivery, with a track record of ramping quickly on new languages and stacks. Experienced collaborating with senior engineers on specifications, code reviews, and CI/CD-driven releases.

EXPERIENCE

Software Engineer | Rebecca Everlene Trust Company

Jul 2025 – Present | Chicago, IL (Remote)

- Engineered a production web platform across a **React/TypeScript** frontend and **Node.js/Express** and **Python/FastAPI** backend services, leading a team of three from MVP to release.
- Designed and implemented secure **REST APIs** with JWT role-based access control, bcrypt password hashing, tiered rate limiting, and input-validation safeguards against injection attacks.
- Built a **FastAPI** recommendation service over async MongoDB, scoring records against a 60-term goal map with alias expansion behind API-key auth.
- Drove quality through **test-driven development** with Jest and pytest suites totaling roughly 1,000 lines, gated by a GitHub Actions validation pipeline, and partitioned a monolithic backend into well-specified, independently reviewed services.

Software Developer | EdvanceSkill for Actuaries

Mar 2022 – Apr 2023 | Bengaluru, India

- Cut API latency **35% (580ms → 380ms)** by diagnosing N+1 query patterns via EXPLAIN ANALYZE, applying SQLAlchemy eager loading, and adding **composite B-tree indexes** informed by the data model.
- Built **React dashboards** backed by permission-filtered REST APIs, implementing **OAuth 2.0 + JWT** authentication and service-layer role-based access control.
- Deployed a Python backend to **AWS** on Linux containers with least-privilege IAM roles, CloudWatch p99 alarms, and GitHub Actions CI/CD releasing on every merge to main.

Assistant System Engineer | Tata Consultancy Services

Nov 2020 – Feb 2022 | Pune, India

- Maintained **SSIS ETL pipelines** on the Microsoft/Windows stack, integrating SAP, ServiceNow, and Oracle systems of record (assets, transactions, and tickets) through **XML-based interfaces** for downstream reporting.
- Reduced Oracle batch job runtime **77% (35 min → 8 min)** by replacing correlated subqueries with hash joins and a composite covering index, identified via execution-plan analysis; refactored **PL/SQL** from nested cursors to set-based joins.
- Worked within an **Agile** delivery process, handling specifications, bug fixes, and production support under the guidance of senior engineers.

PROJECTS

QuickAPI | Python | FastAPI | PostgreSQL | Docker | JWT

- Reusable backend template with **JWT auth**, **role-based CRUD APIs**, Alembic migrations, OpenAPI docs, and audit logging; reused as the foundation for later deployments.

Risk Analytics Dashboard | React | Vite | Tailwind CSS | Recharts | Personal project

- Credit-rating dashboard with **protected routes**, **session-based auth**, and a sortable, paginated ratings table over a 40-company dataset, plus status and industry/tier charts.
- Built a **reusable component library** on a custom CSS design-token system (colors, type scale, spacing, shadows), fully dark-mode aware with centralized Recharts theming and filter logic extracted into a custom hook.

SupportAI | Python | FastAPI | FAISS | BM25 | SentenceTransformers

- Retrieval system over **1,000+ academic papers** combining embeddings, BM25 keyword search, and cross-encoder reranking, returning answers with cited sources. Built as MS Research Assistant at UNC Charlotte.

SKILLS

Languages	SQL, Python, JavaScript, TypeScript
Databases & Data	PostgreSQL, Oracle, MongoDB, Redis; query optimization, indexing, relational data modeling, ETL (SSIS)
Backend	Node.js, Express, FastAPI, REST APIs, JWT, OAuth 2.0, RBAC, SQLAlchemy
Frontend	React, HTML5/CSS3, Tailwind CSS, Vite, XML
Practices & Systems	Test-driven development (Jest, pytest), code review, Agile, Git, CI/CD (GitHub Actions); Linux/UNIX, Windows, Docker, AWS, Terraform

EDUCATION

University of North Carolina at Charlotte | MS Computer Science

Aug 2023 – May 2025 | Charlotte, NC

Medi-Caps University | B.Tech Computer Science Engineering

Aug 2016 – Aug 2020 | Indore, India
