

Dushyant Singh Pawar

Seattle, WA | +1 (919) 579-1341 | dushyantsinghpawar@gmail.com | LinkedIn | GitHub | Portfolio

Professional Experience

- Software Engineer** Jul. 2025 – Present
Rebecca Everlene Trust Company Chicago, IL
 - Developed and maintained backend services and RESTful APIs for the MedKids platform, supporting multi-tenant parent-child workflows and active feature development.
 - Designed and implemented JWT-based authentication and role-based access control (RBAC), resolving authorization gaps that blocked onboarding and API access.
 - Developed an event-driven data ingestion pipeline using AWS Lambda and PostgreSQL, incorporating retries and idempotent processing to safely handle partial failures.
 - Investigated and resolved recurring service failures using structured logging, log analysis, and controlled reproduction, improving system stability.
 - Collaborated with product and frontend teams to validate API contracts and ensure secure, consistent data access patterns.
- Software Developer** Mar. 2022 – Apr. 2023
EdvanceSkill for Actuaries Bengaluru, India
 - Developed and optimized backend services and RESTful APIs using FastAPI and PostgreSQL, reducing average response times by 30–40% through query optimization and indexing.
 - Implemented JWT-based and Google OAuth authentication flows, validating correctness under concurrent access and sustained API traffic.
 - Performed load testing using JMeter and k6 to identify throughput bottlenecks and guide performance improvements.
 - Automated CI/CD pipelines using Docker and GitHub Actions, enabling consistent and repeatable deployments across environments.
- Assistant System Engineer** Nov. 2020 – Feb. 2022
Tata Consultancy Services Pune, India
 - Optimized long-running SQL queries and scheduled ETL workflows by addressing inefficient joins and indexing gaps, reducing execution times from tens of minutes to under ten minutes.
 - Developed and maintained data pipelines using SQL, SSIS, and Oracle PL/SQL to process high-volume transactional data for internal reporting systems.
 - Supported integrations across SAP, ServiceNow, and Oracle platforms, ensuring reliable daily data synchronization across business units.

Technical Skills

Programming Languages: Python, Java, SQL, JavaScript

Frameworks & APIs: FastAPI, RESTful APIs, GraphQL, Spring Boot, Django REST

Cloud & Distributed Systems: AWS (Lambda, API Gateway, ECS, Fargate, S3, RDS, DynamoDB, SQS, SNS, EventBridge), Docker, Kubernetes, event-driven architectures, asynchronous processing, idempotency, retries

Datastores: PostgreSQL, MySQL, Oracle, MongoDB, Redis, DynamoDB

Authentication, Testing & CI/CD: JWT, OAuth 2.0, RBAC, GitHub Actions, JMeter, k6

Projects

SupportAI – Retrieval-Augmented Generation System UNC Charlotte Research, 2024–2025
Developed a distributed system for document ingestion, indexing, and retrieval using Python and LangChain, supporting semantic search over 1,000+ academic documents. Designed a multi-stage ingestion and query pipeline and optimized retrieval workflows to achieve sub-second response times under concurrent access.

Event-Driven Order Processing Service Personal Project
Developed an event-driven service using AWS Lambda, SQS, and DynamoDB to process asynchronous order events. Implemented retries, idempotent handlers, and dead-letter queues to ensure reliable processing and safe failure recovery.

Education

University of North Carolina at Charlotte Aug. 2023 – May 2025
Master of Science in Computer Science | GPA: 3.90 / 4.00 Charlotte, NC

- Research Assistant:** Developed backend components for SupportAI, a document retrieval system processing 1,000+ academic papers.

- Teaching Assistant:** Mentored 90+ students in Data Mining and Robotics courses.

Medi-Caps University Aug. 2016 – Aug. 2020
Bachelor of Technology in Computer Science Engineering Indore, India
